

Original Rock Band RC.BUDAKA

Music has forever been about unique sounds, collaborations and exploring new combinations of creativity that roam down every possible avenue in search of that incredible breakthrough. Such has been the case for both Rob Carlton (Guitars) and Budaka (Vocals), coming together as a unified two-piece after having played & practiced for years before discovering the authentic sound they have when combining their musical forces as RC Budaka.

By drawing on the powerful riffs and tones of RC's guitar, this duo has become an excellent display of classic-style songwriting built solidly for today's modern world. The first released single from RC Budaka hit the internet in 2014, called "Sweet Medicine," features a complete sample of the creativity and combination of these two artists that highlights their own unique style of songwriting and their skilled musicianship. With a familiar feel and warm textures and tones through both the music and the vocals; RC Budaka is making music that the people out there can easily relate to.

2015 album titled: RIGHT NOW
